## SOL-X at Posidonia 2022

SOL-X is excited to participate in Posidonia 2022 in Athens, home to one of the largest shipping communities in the world.

We will be unveiling our latest version of SAFEVUE.ai that **addresses Human Factors with Game Changing Safety Workflow Automation and Crew Wellbeing Insights**. As part of the holistic approach to crew safety and wellbeing, SOL-X will also be showcasing one of the world's first ATEX Zone 1 approved SmartWatch. We will demonstrate how it enhances the different facets of crew safety management onboard related to some of the most common incidents.

“SOL-X is excited to be participating in this year’s Posidonia, to meet one of the world’s largest shipping communities and most progressive ship owners, managers, and service operators in support of the world’s largest fleet. We believe our game changing solution SAFEVUE.ai will elevate crew safety management entirely and delivers operational efficiency, safety, and compliance assurance, and most importantly differentiate your business competitiveness.” - Paul Keng Teoh, VP of Growth.

According to EMSA, in 2019, 66% of incidents and injuries in maritime can be attributed to “Human Factors”. SAFEVUE.ai, our flagship solution combines enhanced Control Of Work with a holistic approach to Crew Wellbeing enabled by Industrial Internet of Things and analytics.

Our solution will help to raise safety standards, providing ship owners and ship managers the compliance assurance of safety process along with new data about their crew and their safety behaviours like they never could before. This opens up immense opportunity to help address safety incidents before they happen.

### **About Posidonia**

The international shipping exhibition has long been established as one of the major calendar events of the shipping major companies and organizations active in all sectors of the shipping industry. The international exhibition Posidonia first took place in 1969 and has been taking place every two years ever since. Posidonia not only serves as a bridge linking the international shipping industry with the Greek shipowners, who operate the largest fleet globally of over 4,000 vessels, the largest under the control of any national group, but also serves as the platform that brings international shipowner in touch with the latest developments in the shipping industry and offers them direct access to the entire range of shipping products and services available on the international shipping market.

### **About SOL-X**

SOL-X is a leading Industrial Internet of Things safety technology company centered on human factors. Combining deep maritime knowledge with Internet of Things capabilities and predictive Artificial Intelligence, our focus is on improving safety and compliance outcomes, increasing operational productivity, and enhancing Crew Wellbeing. SAFEVUE.ai is an industry leading Behavioural Based Safety system that combines an enhanced Control Of work with a holistic approach to Crew Wellbeing - improving worker health and safety culture.
